PAPERS

Adaptive Optimal Decision in Multi-Agent Random Switching Systems	<i>M. Liu, Y. Wan, and F. L. Lewis</i>	265
Reference Governor for Constrained Control Over Lossy Channels	<i>M. Pezzutto, E. Garone, and L. Schenato</i>	271
Cooperative Aerial Load Transportation via Sampled Communication	<i>E. Rossi, M. Tognon, R. Carli, L. Schenato, J. Cortés, and A. Franchi</i>	277
Design of Robust Lyapunov-Based Observers for Nonlinear Systems With Sum-of-Squares Programming	<i>D. Pylorof, E. Bakolas, and K. S. Chan</i>	283
On the Design of Structured Stabilizers for LTI Systems	<i>F. Ferrante, F. Dabbene, and C. Ravazzi</i>	289
Learning and Information Manipulation: Repeated Hypergames for Cyber-Physical Security	<i>C. Bakker, A. Bhattacharya, S. Chatterjee, and D. L. Vrabie</i>	295
Constrained Control of Linear Discrete-Time Systems Under Quartic Performance Criterion	<i>F. Liberati and E. Garone</i>	301
On the Design of Security-Guaranteeing Dynamic Watermarks	<i>B. Satchidanandan and P. R. Kumar</i>	307
Sliding Mode Control Techniques and Artificial Potential Field for Dynamic Collision Avoidance in Rendezvous Maneuvers	<i>M. Mancini, N. Bloise, E. Capello, and E. Punta</i>	313
Observability and Reconstructibility of Probabilistic Boolean Networks	<i>E. Fornasini and M. E. Valcher</i>	319
Real-Time Identifiability of Power Distribution Network Topologies With Limited Monitoring	<i>G. Cavraro, A. Bernstein, V. Kekatos, and Y. Zhang</i>	325
Detectability Analysis and Observer Design for Linear Time Varying Systems	<i>M. Tranninger, R. Seeber, S. Zhuk, M. Steinberger, and M. Horn</i>	331
Flatness and Submersivity of Discrete-Time Dynamical Systems	<i>P. Guillot and G. Millérioux</i>	337
Realization of r -Robust Formations in the Plane Using Control Barrier Functions	<i>L. Guerrero-Bonilla and V. Kumar</i>	343
Asymptotic Stability Analysis of Lur'e Systems With Butterfly Hysteresis Nonlinearities	<i>M. A. Vasquez-Beltran, B. Jayawardhana, and R. Peletier</i>	349
Output Tracking Control Design of Switched Boolean Control Networks	<i>A. Yerudkar, C. Del Vecchio, and L. Glielmo</i>	355

(Contents Continued on Page ii)

Asymptotic Unknown Input Decoupling Observer for Discrete-Time LTI Systems	<i>D. Ichalal and S. Mammari</i>	361
An Optimized Input/Output-Constrained Control Design With Application to Microgrid Operation	<i>R. Harvey, Z. Qu, and T. Namerikawa</i>	367
Prediction-Correction Splittings for Time-Varying Optimization With Intermittent Observations	<i>N. Bastianello, A. Simonetto, and R. Carli</i>	373
Improving Controllability and Plug-and-Play Operation of Wind Farms Using B2B Converters	<i>T. Sadamoto and A. Chakraborty</i>	379
On the Design of Stabilizing Cycles for Switched Linear Systems	<i>A. Kundu</i>	385
Combined Backstepping/Second-Order Sliding-Mode Boundary Stabilization of an Unstable Reaction-Diffusion Process	<i>A. Pisano, Y. Orlov, A. Pilloni, and E. Usai</i>	391
Counterexample to a Lyapunov Condition for Uniform Asymptotic Partial Stability	<i>J. Orłowski, A. Chaillet, and M. Sigalotti</i>	397
A Stabilizing Sub-Optimal Model Predictive Control for Quasi-Linear Parameter Varying Systems	<i>S. Mate, H. Kodamana, S. Bhartiya, and P. S. V. Nataraj</i>	402
Dynamic L_2 Output Feedback Stabilization of LPV Systems With Piecewise Constant Parameters Subject to Spontaneous Poissonian Jumps	<i>M. Zakwan</i>	408
Distributed Computation for Solving the Sylvester Equation Based on Optimization	<i>W. Deng, X. Zeng, and Y. Hong</i>	414
Vortex Formation in a Swarm of Agents With a Coordinates Mixing Matrix-Based Model	<i>G. Fedele, L. D'Alfonso, and A. Bono</i>	420
Tree-Structured Polyhedral Invariant Set Calculations	<i>E. Klintberg, M. Nilsson, A. Gupta, L. J. Mårdh, and P. Falcone</i>	426
Cooperative Avoidance Control With Velocity-Based Detection Regions	<i>E. J. Rodríguez-Seda and D. M. Stipanović</i>	432
Adaptive Trajectory Generation Under Velocity Constraints Using Dynamical Movement Primitives	<i>A. Dahlin and Y. Karayiannidis</i>	438
Analysis of Positive Systems Using Copositive Programming	<i>T. Kato, Y. Ebihara, and T. Hagiwara</i>	444
Scenario-Based Probabilistic Reachable Sets for Recursively Feasible Stochastic Model Predictive Control	<i>L. Hewing and M. N. Zeilinger</i>	450
On Control of Multiagent Systems in the Presence of a Misbehaving Agent	<i>E. Yildirim, S. B. Sarsilmaz, A. T. Koru, and T. Yucelen</i>	456
The L_q/L_p Hankel Norms of Positive Systems	<i>Y. Ebihara, B. Zhu, and J. Lam</i>	462
On Optimal Static Output Feedback Control Synthesis	<i>Y.-S. Chou and S.-F. Wei</i>	468
Robust Estimation and Filtering for Poorly Known Models	<i>M. R. Fernandes, J. B. R. do Val, and R. F. Souto</i>	474
Asymptotically Exact Unweighted Particle Filter for Manifold-Valued Hidden States and Point Process Observations	<i>S. C. Surace, A. Kutschireiter, and J.-P. Pfister</i>	480
Some Insights on Synthesizing Optimal Linear Quadratic Controllers Using Krotov Sufficient Conditions ...	<i>A. Kumar and T. Jain</i>	486
Optimal Strategies of the Differential Game in a Circular Region	<i>E. Garcia, D. W. Casbeer, and M. Pachter</i>	492
Feedback Passivation of Linear Systems With Fixed-Structure Controllers	<i>L. Su, V. Gupta, and P. Antsaklis</i>	498
Errata for "Comments on Truncation Errors for Polynomial Chaos Expansions"	<i>T. Mühlfordt, R. Findeisen, V. Hagenmeyer, and T. Faulwasser</i>	504
Nonsmooth Optimal Value and Policy Functions in Mechanical Systems Subject to Unilateral Constraints ..	<i>B. S. Banjanin and S. A. Burden</i>	506
Model-Free Stochastic Reachability Using Kernel Distribution Embeddings	<i>A. J. Thorpe and M. M. K. Oishi</i>	512
Overshoot Mitigation Using the Reference Governor Framework	<i>C. Freiheit, D. M. Anand, and H. R. Ossareh</i>	518
